

At the café

You are going to make a café scene triarama using paper characters and props. First of all, remove this section so you are left with a square.

On the next page you can cut out the characters and props. Fold each one in the middle, then fold and glue the small flap so your characters and props can stand up.

You will be able to place them anywhere you wish in triangle 2 once the triarama is finished.

In triangle 1 you must write a French dialogue between the waiter and the customer(s). (There is also space to write a small menu on the menu board prop.)

Finally fold all the lines and cut along the dotted line. Glue triangle 3 and stick it underneath triangle 2.
