

## **Times Tables Week!**

You have been working so hard to learn your tables during your time in Year 3 – particularly your 3s, 4s and 8s – and we are so proud of how accurate you are becoming (and how speedy!) You are a year away from the [Year 4 multiplication tables check](#), so this week we are going to work on your confidence with the 3, 4 and 8 times tables (including word problems and inverse division facts).

We all have different strengths; for instance, some of you may be really good at your 3s, others may prefer the 4s and 8s. All of the activities between Tuesday and Thursday are saved as follows:

**Red** – I struggle with this x table.

**Amber** – I am OK with this x table but need more practise.

**Green** – I am confident with this x table and ready for a challenge.

Each day, choose the activity that you are most confident completing. If you whizz through the activity you choose, challenge yourself with the next one. Where there are two activities for a colour, choose one or have a go at both – it's up to you! The Supermovers are there each day to warm you up, remind you and make you smile ☺

As always, we would love to see how you get on! Please continue to upload pictures of your work and any photos or videos of you joining in with the Supermovers!

**Each day** this week, there will be a TTRS Battle of the Bands between our Year 3 boys and girls. This will take place **between 2pm and 3pm**; you don't need to play for the whole hour, but anything you do on TTRS between these times will score points for your team. I will announce the winning team each day, as well as the Most Valuable Players for each team. At the end of the week, there will be an overall winning team based on the week's scores. Good luck everyone!

### **Monday**

Number of the Week.

Multiplication Madness: Just like we do in class. You can either time yourself or set a timer (we used to do 6 minutes) and see how many answers you can complete. Try and beat your time each day this week.

### **Tuesday – LO: To recall 3x table facts.**

Warm up your maths brain with Professor Pipette's 3x table song! Can you keep up with her funky moves too? Will you be able to recall your 3s backwards?

Will you go **Red**, **Amber** or **Green** today?

### Wednesday – LO: To recall 4x table facts.

Today, Cyril the Swan is here to remind you of your 4x table! Will you be able to fill in his missing numbers? And can you reeeeewind?

Will you go **Red**, **Amber** or **Green** today?

### Thursday – LO: To recall 8x table facts.

It's Filbert Fox today, with the 8x table!

Will you go **Red**, **Amber** or **Green**?

### Friday: LO – To recall x facts and inverse ÷ facts.

A screenshot of the Espresso app interface. At the top, there are four colored boxes: yellow (2, 5, 10 times tables), light blue (3, 4, 6 times tables), light green (7, 8, 9 times tables), and light orange (11, 12 times tables). Below these are three main sections: 'Multiplication' (with buttons for 2, 5, and 10 times tables), 'Division' (with buttons for 2, 5, and 10 times tables), and 'Challenges' (with buttons for Challenge 1, 2, and 3).

Spend your maths time today exploring the times tables activities on Espresso. Focus on the multiplication and division activities for the 3, 4 and 8 times tables. Have a go at the challenges too!

You will find the login details for Espresso on Seesaw, or we can email them to you.
