LO: To understand how Stonehenge was built.

Use the map to answer these questions in complete sentences.

1. What was the problem with the bluestones? (Why was it difficult to get them from the Preseli Hills to Stonehenge?)
2. What resources did the Stone Age people use to help solve this problem?
3. How do historians think the bluestones were transported across the Bristol Channel?

Challenge: Using your cut-out pictures from Activity 1 to help you, explain how the stones were put into place at Stonehenge. Use these words: antler pick, hammerstone, ditches, ropes, poles, tongue and groove, mortice and tenon.
